## DETAILED ACTION

### *Specification*

#### **Abstract**

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to **a single paragraph on a separate sheet within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

**Note:** It is not sure whether the information given on page 22, regarding FIGS. 1 and 6, is a part of the abstract or the disclosure.

#### **Disclosure**

The disclosure is objected to because of the following informalities: The disclosure on page 6, regarding references to particular claim or claims, is impractical for at least two reasons, one being that the disclosure is used as a support for the claim language, not the other way around; and another one being that, at issue, some of the claims presented might no longer exist due to cancellation by amendment, and the renumbering of claims will be different as a result of the cancellation. Sometimes, even when there is no cancelled claim at issue, the renumbering of claims could be different when there are many claims in the case.

Numerals 20 represents two different elements. See pages 9 and 11, line 5, and page 17, lines 7 and 8.

Appropriate correction is required.

### ***Claim Objections***

Claim 7 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

### **Allowable Subject Matter**

Claims 1-6 are allowed.

This application is in condition for allowance except for the following formal matters:

The formal matters are as pointed out above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance of claims 1-6: The references of record, taken singly or in combination, fails to teach or fairly suggest the ophthalmic examination and treatment system of independent claim 1 using a plurality of ophthalmic medical instruments, wireless imaging devices, and at least one
